

## TORQUE & TEST SERVICES

Eastern offers high performance trailer mounted hydrostatic test units paired with industry leading local supervisors. This system was developed with improved efficiencies in mind offering time and money savings. Proper testing can ensure the integrity of your equipment and safety of personnel. Our supervisors understand API torque specifications and the equipment they are working on. We are proud to offer Operator Qualified (OQ) & Abnormal Operations Conditions (AOC) personnel that don't just understand the equipment, but also the client operation.

### **Equipment:**

Boatman Trailer Mounted Hydrostatic Tester Rated 10,000 PSI Continuous and 15,000 PSI (test pressure) at 27 GPM

### **Application:**

- Pressure Test
  - Frac Stack, Tree, Flow-line, manifolds, lubricator
- Pipelines
- BOP Stacks
  - Nipple Up & Down
- Methanol Injection
- Accumulator Function
- Hold Back-Pressure during fracs & wireline operations
- Pipelines & Plant Maintenance
